

# CSC212

## Tutorial: Heaps

### Problem 1:

- a) Construct a new binary min-heap from the following elements: 12, 5, 17, 22, 20, 9, 1, 32, 50, 16, 25, 8, 44 and 33
- b) Perform three root/min/head deletions from the heap you built in (a).

### Solution: a)

Insert 12

	12													
--	----	--	--	--	--	--	--	--	--	--	--	--	--	--

Insert 5

	5	12												
--	---	----	--	--	--	--	--	--	--	--	--	--	--	--

Insert 17

	5	12	17											
--	---	----	----	--	--	--	--	--	--	--	--	--	--	--

Insert 22

	5	12	17	22										
--	---	----	----	----	--	--	--	--	--	--	--	--	--	--

Insert 20

	5	12	17	22	20									
--	---	----	----	----	----	--	--	--	--	--	--	--	--	--

Insert 9

	5	12	9	22	20	17								
--	---	----	---	----	----	----	--	--	--	--	--	--	--	--

Insert 1

	1	12	5	22	20	17	9							
--	---	----	---	----	----	----	---	--	--	--	--	--	--	--

Insert 32

	1	12	5	22	20	17	9	32						
--	---	----	---	----	----	----	---	----	--	--	--	--	--	--

Insert 50

	1	12	5	22	20	17	9	32	50					
--	---	----	---	----	----	----	---	----	----	--	--	--	--	--

Insert 16

	1	12	5	22	16	17	9	32	50	20				
--	---	----	---	----	----	----	---	----	----	----	--	--	--	--

Insert 25

	1	12	5	22	16	17	9	32	50	20	25			
--	---	----	---	----	----	----	---	----	----	----	----	--	--	--

Insert 8

	1	12	5	22	16	8	9	32	50	20	25	17		
--	---	----	---	----	----	---	---	----	----	----	----	----	--	--

Insert 44

	1	12	5	22	16	8	9	32	50	20	25	17	44	
--	---	----	---	----	----	---	---	----	----	----	----	----	----	--

Insert 33

	1	12	5	22	16	8	9	32	50	20	25	17	44	33
--	---	----	---	----	----	---	---	----	----	----	----	----	----	----

b)

First Root delete

	5	12	8	22	16	17	9	32	50	20	25	33	44	
--	---	----	---	----	----	----	---	----	----	----	----	----	----	--

Second Root delete

	8	12	9	22	16	17	44	32	50	20	25	33		
--	---	----	---	----	----	----	----	----	----	----	----	----	--	--

Third Root delete

	9	12	17	22	16	33	44	32	50	20	25			
--	---	----	----	----	----	----	----	----	----	----	----	--	--	--

**Problem 2:**

The time complexity of building a binary heap from a sequence of elements when all elements are:

- a. Sorted according to the heap property       **$O(n)$**
- b. Sorted in the inverse of the heap property       **$O(n \log n)$**

**Problem 3:**

Give the implementation of the method `isBinaryHeap(int[] a, int size)` that returns true iff array `a` satisfies max-binary heap condition.

**Solution:**

```
public static boolean isBinaryHeap(int[] a, int size){
    for(int i = 1; i < size; i++) {
        if(i*2 <= size) {
            if(a[i*2] > a[i]) {
                return false;
            }
        }
        if(i*2+1 <= size) {
            if(a[i*2+1] > a[i]) {
                return false;
            }
        }
    }
    return true;
}
```

**Problem 4:**

Can a BST satisfy heap conditions? Give an example if yes.

**Yes, if the BST is empty or if it has only two nodes.**
